

About DeskRoll

DeskRoll is a web-based remote desktop tool. The key benefits of the product are as follows:

- Security
- Ease of use
- Rich customization options.

Branding Benefits

DeskRoll branding is an exclusive offer that delivers value to both your company and your clients. You get substantial benefits in terms of:

- Customer trust
- Communications security
- Your brand awareness
- Full outsourcing of deployment, maintenance/upgrades and monitoring.

Security

Branded DeskRoll offers substantial benefits in terms of security:

- You have full control of the communications server.
- Your application connects only to sessions made at your server.
- You can have components for quick and secure mass deployment of the tool.

Branded Components

We deliver comprehensive branding of the product:

- Full branding of the web part (helpdesk functionality, remote access tool).
- Full branding of the applications (both remote support and unattended access).
- Branding for all the platforms, including Mac.

Performance

Having communications server in certain geographic location may give a performance boost. This is true for infrastructures or browsers where DeskRoll's peer-to-peer connection technology is not working.

Comprehensive Set of Services

We offer full set of services for your branded product:

- Server deployment
- Maintenance and upgrades
- 24/7 monitoring.
